

# MendoFutures

Invites you to join us in viewing *National Geographic's* Documentary

## "CLIMBING REDWOOD GIANTS"

You are invited to spend an evening with J. Michael Fay,  
National Geographic Explorer-in-Residence,  
and Lindsey Holm

Friday, January 29, 2010, from 6 pm to 9 pm

at the Center Theater, Center for the Visual Arts Building, Mendocino College  
1000 Hensley Creek Road  
Ukiah, California

Admission is Free

J. Michael Fay and Lindsey Holm share the experience of their 1,800 mile, 333-day journey deep into the redwood forests of northern California and southern Oregon. The documentary, along with their personal commentary, provides an illuminating look at these marvelous trees from the outermost edges of the forest to the tops of the tallest trees, while sizing up the health and future of the Redwood Region.

By the end of the evening you will 1) gain more knowledge about the opportunity afforded to us by the *National Geographic* publicity about our region, 2) share ideas leading to a step-by-step road map on how to leverage this national and international exposure to benefit your respective organization's initiatives.

Please RSVP via email to Susan Strom at [sjstrom@mcn.org](mailto:sjstrom@mcn.org)

To read more about the cover story on the redwoods with beautiful pictures and video clips of Michael Fay's redwood transect, follow the link to the October 2009 issue of *National Geographic*: [www.ngm.com/redwoods](http://www.ngm.com/redwoods)

To read more about MendoFutures go to [www.mendofutures.org](http://www.mendofutures.org)

If you would like to get involved in influencing our future through the "Redwood Futures Initiative" meeting on Saturday Jan. 30, 2010, please contact Susan Strom at [sjstrom@mcn.org](mailto:sjstrom@mcn.org) for the appropriate information.
